Tutor Facilitation Script

What it might sound like at each step.

#	Step	Say it like this
1	**Students take Cornell notes in their classes**	“Where are your notes from that lesson? Let’s use them.” “What question did you write in the left column for this part?”
2	**Students complete the TRF pre-work**	“What’s coming up in that class? A quiz or test?” “Which problem did you get wrong on your last quiz? That’s a great tutorial question.”
3	**Check the TRF and resources at the door**	“Show me your initial question and where it came from.” “Your POC needs to be a question. Can you turn ‘I don’t get #5’ into a question about the exact step?”
4	**Form tutorial groups (7 students or fewer per tutor)**	“Let’s sit in a horseshoe so everyone can see the board.” “Let’s go around and read our questions to see if any are similar.”
5	**The presenter gives a 30-Second Speech; the group asks questions**	“Please share your 30-Second Speech using your TRF.” “Who is in the same class? What question could you ask based on your notes?” “Remember, I’m tracking participation. I want everyone to ask at least one question.” “I’m putting a ! here because you just figured it out.”
6	**Check for understanding**	“Now that you understand it, explain how the steps in the third column connect to your notes.” “How would you teach this to a friend?” “Try this similar problem without help.”
7	**Repeat Steps 5 and 6 for as many students as time allows**	“Who’s next? Grab your TRF and head to the board.” “We didn’t fully solve it. Let’s write a clear question you can ask your teacher tomorrow.”
8	**Students write a reflection**	“Use the ! I marked in your notes to remember what helped you.” “Finish this sentence: I gained a better understanding when…”
9	**Turn in TRFs for grading and feedback**	“Keep your three-column notes in the right section of your binder. I’ll collect the TRF.”
10	**Debrief**	“What helped our group the most today? What should we change next time?”
